PARCEL POST RATES

On Seeds, Plants, Bulbs, Roots, Books, Tools, etc., within the U. S. and Possessions.

	First pound or fraction	Each additional pound or fraction
Local	7c.	1c (2 lbs)
First and Second Zone within 150 miles of either.....	8c.	1.1c
Third Zone within 150 to 300 miles.....	9c.	2c
Fourth Zone within 300 to 600 miles.....	10c.	3.5c
Fifth Zone within 600 to 1000 miles.....	11c.	5.3c
Sixth Zone within 1000 to 1400 miles.....	12c.	7c
Seventh Zone within 1400 to 1800 miles.....	14c.	9c
Eighth Zone all over 1800 miles	15c.	11c
Canada	14c.	14c

NOTE.—A fraction of a cent in the total amount of postage on any parcel shall be counted as a full cent. Limit of weight for delivery to all zones 70 pounds; to Canada 15 lbs. If weight exceeds this, we will pack in 2 or 3 parcels (not more) provided money is remitted to cover postage. (Mark your Zone Number on order.)

All parcels under 8 ounces are carried everywhere regardless of zone rates at one and one-half cents for 2 ounces.

Low Prices.—A matter of primary importance in buying seeds is to obtain only the best. Our position enables us to supply you with such seeds, and at prices to compete with all reliable seedsmen.

Good Order.—If seeds are not received in good order within a reasonable time, write us and we will look up the shipment. Small orders are often delayed in transit.

Cash.—Money must always accompany the order. Money may be sent safely either by Postoffice Order, Express Order, or Bank Draft. We will be responsible for the safe receipt of remittances sent by either of the above methods. We accept postage stamps the same as cash.

WARRANTY AND QUALITY OF SEEDS.

While we exercise the greatest care to have all our seeds Pure, Reliable, and True to Name, we do not give any warranty, express or implied, as to description, quality, and productiveness, or any other matter, of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they are at once to be returned and the money that has been paid for same will be refunded.

OUTSTANDING FLOWER NOVELTIES FOR 1940

Morning Glory.

- (A) Scarlett O'Hara. Gold Medal All American Selection for 1939, rich dark wine or deep rosy crimson color, dark green foliage, flower about four inches in diameter.
- (B) Alamo or Mile-a-Minute Vine. Creamy white flowers, deep wine red at center. Fine lacey foliage, very fast growing, thrives in hot dry places. Flowers are 1½ inches, opening in late morning and remaining open during the afternoon.

Zinnia.

Fantasy, White Light. White with curled and crested petals, medium sized flower on bushy plants.

Fantasy, Wildfire. Rich dazzling scarlet, free blooming, 2½ to 3 feet tall.

Cupid (dwarf) Pixie. Bright yellow.

Cupid (dwarf) Tiny Tim. Rich scarlet.

Cupid (dwarf) Snowdrop. Pure white.

Scabiosa, Imperial Giants Blue Moon.

Rich deep lavender blue, tall plants, broad, heavy, wavy petals, eliminating pin-cushion center completely, fully double. Flower extremely large and deep, about the shape of an old-fashioned beehive.

Cosmos, Sensation Pinkie and Purity. Flowers are immense size, 4 to 5 inches in diameter with broad heavy fluted petals which overlap. A good full flower produced within 8 to 10 weeks from seed. Purity is a white flower of same description as the Pinkie. Plants reach a height of 3 to 4 feet.

The Bush Balsam. Glossy green foliage, easy culture and Camellia-like flowers. Blossoms borne at end of stem, not under leaves. Mixed colors.

Celosia, Royal Velvet.

Twenty-four inch plants with large long stemmed cockcombs of rich carmine, foliage bronzy green with reddish margins.

Salvia, Farinacea, Blue Bedder.

Compact, deep blue, growing three feet.

Vegetable Plants, all varieties.

Tomato
Cabbage
Mango or Pepper
Sweet Potato

Flower Plants, all varieties.

Aster
Salvia
Snapdragon
Zinnia
Petunia
Verbena

Vitamin B., 1 grain vial 1.00
(Thiamin Chloride) New powder form vitamin producing sensational results in plant cultivation and transplanting.

ASK FOR PRICES.

ASPARAGUS.

An ounce of seed will sow 50 feet of drill, and produce about 300 plants. Fair crops may be expected the third year from seed.

	Oz.	¼ lb.	Lb.
Washington, Martha10	.25	.75
The original rust resistant variety; heavy yielding, large dark green stalks; of fine quality.			
Washington, Mary10	.25	.75
The highest type of the rust-resistant asparagus. It is earlier, larger and longer than the original Washington and quite as resistant. Tips are very tight and do not "sprangle out" or "blow" prematurely.			

BEANS.—Dwarf or Bush.

Postage on all Beans to be paid by purchaser. See Parcel Post Rates Front Page.

Beans should not be planted before the ground becomes light and warm, in favorable seasons usually about the first of May. The soil should be rich and mellow, and the seeds scattered about 3 inches apart in drills that are to 2 to 2½ feet apart, and covered about 2 inches deep. Successive sowings, made at intervals of about two weeks until the middle of July, will give a plentiful supply of beans throughout the season. One pound of seed will sow 100 feet of drill.

GREEN PODDED SORTS.

	Lb.	¼ Bu.	Bu.
Plentiful.20	2.25	8.00
Improved Bountiful type, stringless, long straight medium deep green pods. Shows a definite resistance to rust disease. Very productive.

Wardwell's Kidney Wax20	\$2.25
German Black Wax20	2.25
Improved Golden Wax20	2.25
A standard sort.		
Crystal White Wax20	2.25
Round; white pods; fine for pickling.		

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

POLE BEANS.

Less hardy than the Bush Beans, and should be planted several weeks later, when the ground is warmer. Plant the seeds in slightly raised hills 3 or 4 feet apart, 4 or 5 seeds to the hill. The Limas are especially tender, and the rule for late outside planting with them is rigid. Painstaking cultivators, who are usually the most successful, plant them eye downward, after setting stout poles for every hill. All sorts of late-ripening Pole Beans are benefitted by pinching the tips of the vines back when they are about 5 feet high. A pound will plant about 100 hills.

	Lb.	¼ Bu.
Lazy Wife's20	2.25
Missouri Wonder20	2.25
Speckled Cut Short Corn Bean20	2.25
Horticultural or Cranberry20	2.25

SWEET CORN.

Postage to be Paid by Purchaser. See Parcel Post Rates on Front Page.

The Sweet or Sugar varieties being liable to rot in the cold or wet ground, should not be planted before May, or until the ground has become warm, and for a succession continue planting every two weeks, until the middle of July, in rich, well-manured ground in hills three feet apart each way, covering about half an inch and then thin out three plants to a hill, or plant in rows four feet apart and to stand eight inches apart in the rows. One-quarter pound to 100 feet; 1 gallon to the acre.

Black Mexican20	1.50	5.00

PEAS.

Postage to be Paid by Purchaser. See Parcel Post Rates on Front Page.

Peas succeed in light, dry, loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold and must be planted later. Sow all the varieties quite early and depend for succession upon the different times of ripening of the various sorts, or from the first sowing sow every two weeks until June for a succession. One-half pound to 100 feet; 2 bushels to the acre.

	Lb.	¼ Bu.	Bu.
Alaska20	2.25	8.00
The very earliest and best blue pea. Height, 2 ft.			

PEAS—Continued.

	Lb.	¼ Bu.	Bu.
First and Best20	2.25	8.00
Very Early. Height, 2½ ft.			
World's Record20	2.25	8.00
An improved type of Gradus, being slightly earlier, more dwarf, true to type and productive. Height 2½ feet. Vines moderately stout, medium green; pods medium green, 4 in. long, very broad, pointed and well filled with 7 to 8 very large, dark green peas of exceptional quality.			
Chicago Market20	2.25	8.00
Wrinkled variety; height 1½ ft.; about one week later than Gradus.			
Giant Stride20	2.25	8.00
Gradus, or Prosperity20	2.25	8.00
One of the earliest of wrinkled varieties; large pods. Height, 2½ ft.			
Thomas Laxton20	2.25	8.00
Similar to Gradus only a few days later.			
Nott's Excelsior20	2.25	8.00
An improvement on American Wonder. Height, 1 ft.			
American Wonder20	2.25	8.00
Well known and very popular. Height, 1 ft.			
McLean's Little Gem20	2.25	8.00
Very prolific; a garden favorite. Height, 1 ft.			
Laxtonian20	2.25	8.00
Large, full pods; fine quality. Height, 1½ ft.			
Telephone20	2.25	8.00
Enormous pods; fine quality. Height, 4½ ft.			
Champion of England20	2.25	8.00
Well known standard variety. Height, 5 ft.			
Little Marvel—64 Days20	2.25	8.00
Vine strong and vigorous, about 18 inches tall. Showy pods about 3 to 3½ inches long, blunt ended. Seed large, green, wrinkled. A very fine productive, dwarf, sturdy variety.			
Laxton Progress20	2.25	8.00
Few days earlier than Laxtonian. Vines 18 inches tall, pods 4 inches long. A valuable new variety.			
Luscious Sugar, Edible pods. Height, 4 ft.....	.20	2.25	8.00

BEETS.

The soil best suited to the Beet is a deep, light and rich loam. For very early crops, the seed is sown in hotbeds, and the seedlings are transplanted to the open ground. For main crop, the seed is sown outside as soon as the soil is in good condition, in drills from 12 to 15 inches apart, and covered about an inch deep; the plants are thinned to stand 4 or 5 inches apart in the rows. For winter crops, sow seed in June, in drills, as for early Beets. An ounce of seed will sow 100 feet of drill; five or six pounds will sow an acre.

	Oz.	¼ lb.	Lb.
New Crosby's Egyptian10	.25	.75
Detroit Dark Red Turnip Beet10	.25	.75

BRUSSELS SPROUTS.

	Oz.	4 Oz.
Dwarf Improved25	.90
Species of Cabbage; cultivation the same.		

BROCCOLI.

	Oz.	4 Oz.
Italian Green Sprouting50	1.50
A distinct variety, extensively cultivated by Italian gardeners. Plant forms a large, solid head which remains green. When the central head is cut, numerous sprouts develop from the leaf axes, each sprout terminating in small green heads, which are bunched for market.		

COLLARDS.

	Oz.
True Georgia15
Used as Greens.	

CABBAGE.

Seed sown in hotbed or greenhouse about February 15 will give plants large enough to transplant into hotbeds about March 10. Set them 2 or 3 inches apart each way, and as soon as they become well established remove the glass for part of the day, to harden them for final transplanting into the open ground, increasing the exposure daily until April 10 or 20, when the final transplanting may be made. Plants for this early crop need not stand further apart than 1½x2 feet. For late crops, sow seeds in April or May, and transplant to the open ground when large enough, setting the plants up to the first leaf, and 2x3 feet apart. It is important that the plants should not stand thick in the seed-beds, as this would induce weak, slender plants.

One oz. to 1500 plants; 2 oz. to the acre.

	Oz.
Copenhagen Market25
Nearly as early as Wakefield, with solid round heads.	
Marion Market25
Yellow Resistant.	
Burpee's All Head Early25
Larger than Early Summer and earlier.	
Early Jersey Wakefield25
The standard sort.	
Large Charleston Wakefield25
Very solid and not so pointed.	
Early Dwarf Flat Dutch25
Reliable and popular among market gardeners.	
Early Winningstadt25
Early; very solid.	
Fottler's Early Drumhead25
A first-rate second early.	
All Seasons25
Fine, large heads. Yellow resistant.	
Henderson's Succession25
Similar to All Seasons.	
Burpee's Sure Head25
Medium size; round; very solid and fine grained.	
Selected Flat Dutch25
A selected strain of large size and a good header.	
Late Drumhead25
Danish Ballhead25
Golden Acre25
Extra early selection of the Copenhagen type, maturing with Jersey Wakefield and the earliest of the round head cabbage.	
Mammoth Rock Red25
The largest and solidest of all red cabbages.	
Improved American Savoy25
Very fine quality.	
Jersey Queen25
Early, peaked head, wilt-resistant, yellow-resistant.	
Wisconsin Hollander25
Early, round head, wilt-resistant, yellow-resistant.	

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

CAULIFLOWER.

Culture for Cauliflower and cabbages is essentially the same, but to the former extra care given in applying fertilizers and moisture well repays the gardener. Sow the seeds for early and late crops as directed for cabbage, but do not set the early plants in the open field too soon, for if too much stunted by severe frosts they begin to form heads before they are strong enough to develop them well. Plants which have not headed before winter sets in may be stored in a cool cellar or coldframe, and will form heads there without any further attention.

One oz. to 1500 plants; 2 oz. to the acre.

	Pkt.	¼ Oz.	½ Oz.
Early Snowball10	.50	1.00
Early dwarf and reliable.			

CARROT.

Carrots succeed best on heavy loam, which preferably should have been well fertilized the previous year, as fresh manure often causes the roots to grow pronged and misshapen. Sow the seed as early in the spring as the ground can be prepared, firming the soil down over them.

One ounce of seed will sow 200 feet of drill; 2 pounds will sow an acre.

	Oz.	¼ lb.	Lb.
Coreless (New ½ Long Blunt Pointed)15	.50	1.25
Oxhart10	.30	.75
Roots short and very thick.			
Danver's Half Long10	.30	.75
Good for all purposes.			
Long Orange10	.30	.75
Large; good for stock also.			
Chantenay Half Long (The Model)10	.30	.75
Excellent medium early half-long stump rooted variety; roots about 6 inches long, very thick, smooth and of a deep orange-red color.			

CELERIAC.

Sow in early spring; transplant the seedlings in May. They will be ready for cooking in October and may be preserved in dry sand for use during winter.

	Oz.
Turnip Rooted Celery25

CELERY.

Celery can be grown on any garden soil, but is finest on deep, mellow bottom land. Seed for early crops should be sown in hotbeds about March 15. The plants may either be thinned to give them room to grow, or transplanted to another bed to grow until it is time to plant them in the open ground. For main crop, seed should be sown in the open air as soon as the soil and air are warm enough. They should be covered lightly, or merely pressed into the earth with a board if the soil is fine and mellow. The seed-bed must be kept free from weeds and well watered in dry weather. When the plants are large enough, transplant them to shallow trenches or furrows from 4 to 6 feet apart, according to the variety grown, setting the plants 6 inches apart in the rows and pressing the soil firmly around them. One oz. to 10,000 plants.

	Oz.
Golden Self Blanching, French Stock50
White Plume25
Celery Cabbage or Chinese Lettuce.	
Wong Bok, short variety25
Pe Tsai, tall variety25

CORN SALAD.

Sow the seed thickly in shallow drills in September, and firm the soil well down above it, if the weather be dry. Highly appreciated, and much grown where other salads and lettuces do not succeed. An ounce of seed will sow a bed 20 feet square.

	Oz.	¼ lb.
Large Leaf10	.25
Fine for salad.		

CRESS.

	Oz.
Curled or Pepper Grass20
Used for salad; very pungent.	
True Water Cress40
Delicious flavor; very wholesome.	

CUCUMBERS.

The seed can not be planted in the open ground before the weather has become warm and settled, and the ground mellow and light. Plant the seeds in well-enriched hills about 4 feet apart each way, and as soon as all danger from insects is over thin the plants to leave four of the strongest in each hill. One oz. to 50 hills; 1 pound to the acre.

	Oz.	¼ lb.	Lb.
Longfellow (New)10	.30	1.00
An excellent long, slender, dark green variety equally desirable for greenhouse forcing or out door culture. An ideal type for the private garden or as a "straight pack" variety for shipment to market. 12 to 14 inches long by 2½ inches in diameter.			
Straight Eight10	.30	1.00
White Wonder10	.30	1.00
Fruit, produced in clusters, is symmetrical, short, blocky and rounded at both ends; color ivory-white from time of forming until maturity; moderately productive. 6x2½ inches.			
The Davis Perfect10	.30	1.00
Alaska10	.30	1.00
Rollinson Telegraph (Greenhouse forcing)	2.00		
Early Fortune10	.30	1.00
Very fine, early and productive white spine.			
Early Cluster10	.30	1.00
Chicago Pickling10	.30	1.00
Improved Long Green10	.30	1.00
West India Gherkin.....	.10	.30	1.00
Good for pickling only. (Small.)			
Japanese Climbing10	.30	1.00
It is suitable for growing either in frames or in the open air. It is very early and exceedingly productive. The fruit is excellent either for table or pickling.			

LETTUCE.

Seed for the first outdoor crop is usually sown in hotbeds in February, and the seedlings transplanted to the garden in April, 8 to 12 inches apart, in rows 12 inches apart. For a succession until frost, sow in drills in the open ground at intervals of every two or three weeks, and thin the plants to stand 6 to 8 inches apart. For plants to force in hotbeds from November until spring, sow seed in hotbeds in the fall, and cover up as winter approaches, until the plants are required for use. Or the seed may be sown in hotbeds early in winter and the seedlings transplanted when large enough into fine and well-prepared garden soil. One-fourth oz. to 100 feet of drill; 2 pounds to the acre.

	Oz.	¼ lb.	Lb.
Grand Rapids15	.50	1.50
Extra fine for forcing.			
Paris White Cos, Trianon or Romain10	.40	1.00
55 days, a strong grower with long shell-shaped leaves of excellent quality, though a self-folder, should be entirely blanched by tying up that the inner leaves may be made crisp and white, when it is decidedly more palatable than cabbage-heading sorts.			
Black Seeded Simpson15	.40	1.00
Stands heat well.			
Early Curled Simpson15	.40	1.00
Good for forcing and out doors.			
Philadelphia Butter15	.40	1.00
Solid heads of large size; stands heat and cold well.			
Prize Head15	.40	1.00
Leaves frilled and blistered; very crisp.			
Hanson15	.40	1.00
Stands drought and hot sun well.			

LETTUCE.—Continued.

	Oz.	¼ lb.	Lb.
Wayahead15	.40	1.00
A very early, handsome, sure-heading variety.			
Big Boston15	.40	1.00
Brown Dutch15	.40	1.00
Leaves brown.			
Iceberg15	.50	1.50
The hardest heading variety of all.			
May King15	.40	1.00
Heads extra large and solid; green outside but heart clear yellow.			
N. Y. or Wonderful15	.50	1.50
A large late sort, cabbage heading variety, with large, crumpled, dark green leaves. Similar to N. Y. cabbage.			

ENDIVE.

This is an important fall and winter salad. For early, the seed should be sown in April, in drills 15 inches apart, and the seedlings thinned to stand 12 inches apart in the rows. Sowings for the main crop may be made in June and July, as the vegetable is used principally in fall and winter. The inner leaves are blanched by tying the tips of the outer ones together, or by laying boards over the plants.

One-fourth oz. to 100 feet of drill.

	Oz.	¼ lb.
Broad Leaf Batavian15	.50
Thick, slightly wrinkled; forming a loose head.		
White Curled15	.50
Green Curled15	.50

EGG PLANT.

Sow the seed in hotbeds early in March, transplant to small pots and plunge them in the same beds; this is to make them strong and stocky. They should not be planted out until May or June, when the weather becomes warm and settled, as cool nights and wet weather will check their growth. Set the plants in rows 3 feet apart each way and give them thorough cultivation, drawing the earth up to the stems when they are about a foot high. Repeated sowings are sometimes necessary, as the seed does not germinate freely without strong and uniform heat. One oz. to 2,000 plants.

	Oz.
New York Improved Spineless40
Black Beauty40

KALE.

One oz. to 2,000 plants; 1 pound to the acre.

	Oz.	¼ lb.	Lb.
Improved Siberian10	.25	.75
Dwarf German Green10	.25	.75
Tall Curled Scotch10	.25	.75

SWISS CHARD, SILVER OR SEA KALE.

Grown exclusively for its leaves, which can be used and served like Spinach. Cultivation same as for Beets

.10	.25	.75
-----	-----	-----

KOHL RABI.

Very palatable when prepared for the table like turnips. If the weather is favorable the seed should be sown in April, in rows 18 inches apart, and the seedlings thinned to stand a foot apart. One-half oz. to 100 feet of drill.

	Oz.
Early White Vienna25
Early Purple Vienna25

LEEK.

Used for seasoning soups and boiling with meats. The seed should be sown in hotbeds in early spring, and the seedlings transplanted later to the open ground, 8 inches apart, in rows from 12 to 15 inches apart. One-half oz. to 100 feet of drill.

	Oz.
Broad Scotch or London Flag25

MUSHROOM SPAWN.

American Pure Culture Spawn	1 lb. Brick	.35
-----------------------------------	-------------	-----

MUSTARD.

The young and tender leaves of the mustard are greatly relished as salads or when cooked like spinach. The seed should be sown in shallow drills as early as the ground can be prepared in spring, and the leaves cut when several inches long.

One oz. to 50 feet of drill.

	Oz.	¼ lb.	Lb.
White10	.20	.50
Southern Giant Curled10	.20	.50
Ostrich Plume10	.20	.50
Fordhook10	.20	.50
Stands well, very productive.			
Mustard Spinach10	.20	.50
A Japanese plant of the Mustard family which has become popular with the gardeners for its extremely quick habit of growth, producing a marketable crop of excellent mild mustard greens in about four weeks from seed.			

OKRA.

The tender young pods are used for seasoning soups and stews. Sow the seeds thickly in rich soil about the middle of May, in drills 3 feet apart, and cover the seeds an inch deep. Two oz. to 100 feet of drill.

	Oz.	¼ lb.
Dwarf Green10	.25
Perkins' Mammoth10	.25
Green podded; an excellent strain.		
White Velvet10	.25

ONION.

Onions thrive best on a rich, deep, loamy soil. For sets, the seeds should be sown very thickly in drills as early as possible in spring. In summer, as soon as the tops die down, harvest the bulbs and store them in a dry, cool place, spreading them in thin layers. Early in the following spring replant them 4 inches apart, in small drills 12 inches apart, and they will form into fine, large bulbs early in the season. Large Onions may also be grown from seed the first season if the land is strong and well manured, the seed sown thinly in drills a foot apart, and the seedlings thinned to stand 3 or 4 inches apart in drills; they must be well cultivated and kept free from weeds. Five pounds per acre will be required for large onions; for sets, 25 to 30 pounds.

One-half oz. to 100 feet of drill.

	Oz.	¼ lb.	Lb.
Mammoth Prizetaker25	.75	2.00
Largest yellow onion grown.

Yellow Danver25	.50	1.50

PARSLEY.

Much used for garnishing and flavoring soups, stews, etc. The seed is slow to germinate, and should be sown as early as possible, in drills 12 inches apart, thinning plants in rows 4 to 6 inches apart. One-half oz. to 100 feet of drill.

	Oz.
Plain, for flavoring20
Moss Curled. Finely cut and curled for garnishing.....	.20

MUSKMELON.

Muskmelon seed should not be planted outdoors until the ground has become warm and dry. The hills should be about 6 feet apart, and carefully prepared. Rich earth is far better for the young plants than manure; but if the latter must be used see that it is well rotted. Plant from six to twelve seeds in a hill, and when the young seedlings are strong enough to resist the attacks of insects, thin them, leaving three of the strongest in each hill. One oz. to 50 hills; 1 to 2 pounds per acre.

	Oz.	¼ lb.	Lb.
Tip Top10	.25	.75
Yellow flesh, sweet, juicy and of finest flavor.			
Burrell's Gem, or Ordway10	.25	.75
A yellow fleshed nutmeg, very sweet, and a good seller.			
Hoodo or Hearts of Gold10	.25	.75
This new variety is the equal of any melon, and superior in its round qualities. Yellow flesh.			
Emerald Gem10	.25	.75
Extra early; orange flesh; very sweet.			

MUSKMELON.—Continued.

	Oz.	¼ lb.	Lb.
Honey Rock10	.25	.75
Honey Dew10	.25	.75
Osage10	.25	.75
Yellow flesh.			
Pollock's No. 10-2510	.25	.75
A selection from No. 25, having deeper salmon tint, more uniform in size and better netted. Popular as a shipping melon at Rocky Ford.			
Rocky Ford Colorado grown Netted Gem10	.25	.75
Hale's Best No. 4510	.25	.75
A remarkably early shipping melon from the Imperial Valley, Cal. Melons are oval in shape, about 6 in. long by 4½ in. in diameter, with heavy netting and fairly distinct ribbing. Flesh exceptionally thick and deep salmon in color. A most promising and profitable variety.			
Extra Early Hackensack10	.25	.75
Blue Ribbon Gem10	.25	.75

WATERMELON.

Secure good strong vines early in the season by making the hills large, mellow and well drained, with the manure placed so that they will not dry out quickly under hot suns. All possible protection from insects should be given the young plants, and as a protection from insects, use dry ashes or coal dust sprinkled over the leaves. Plant the seeds thickly, and thin the plants to four of the strongest in each hill.

One oz. to 50 feet of drill; 1 to 2 pounds to the acre.

	Oz.	¼ lb.	Lb.
Early Kansas10	.20	.60
Another recent introduction that merits a place among the best of the watermelons. It is an early type, exceptionally vigorous grower, and a proven high producer of unusually fine fruits well suited for shipping.			
FRUIT—Oval in shape, weighs 30 pounds; thin rind, light green with broad dark green irregular stripes; flesh, solid deep red, fine textured, tender, delightful flavor; seeds, buff color.			
Kleckley Sweet, Wilt Resistant10	.20	.60
The sweetest table melon known.			
Dixie Bell or Stone Mountain, Wilt Resistant.....	.10	.20	.60
Monte Cristo10	.20	.60
Very sweet and tender; flesh rich red.			
Halbert's Honey10	.20	.60
Dixie Queen10	.20	.60
A new introduction of many superb qualities and already a leading commercial variety. A good shipper and a splendid home garden melon. It matures to an ideal size and produces an unbelievable number of fruits.			
FRUIT—Almost round, with squarish ends; weighs around 30 pounds; rind, thin and tough, light green color with dark green stripes; flesh, fine grained, tender, lusciously flavored, and rich scarlet color; seeds, very small and white colored.			
Cuban Queen10	.20	.60
Irish Grey10	.20	.60

PUMPKIN.

Grown principally for stock-feeding, yet some are so sweet, juicy and fine-grained that they will always be considered indispensable for pies and sauces. The vines require the same culture as that

recommended for melons, but the seeds must be planted in hills much wider apart; frequently they are planted among corn. A pound of seed will plant from 200 to 300 hills. One to two pounds to the acre.

	Oz.	¼ lb.	Lb.
Sweet Cheese or Kentucky Field.....	.05	.15	.35
The best sort.			
Cushaw and striped Cushaw10	.25	.75
Long, yellow, crookneck; fine for table or stock.			
Cushaw, Golden10	.25	.75
Similar to White Cushaw, except in color of shell, which is golden yellow.			
Cushaw, Striped10	.25	.75
Of the crookneck type with mottled green and white stripes; fruit will weigh from 10 to 15 pounds; flesh yellow, very solid and fine grained.			
Japanese Pie10	.25	.75
Small Sugar10	.25	.75

POP CORN.

	Lb.
White Rice10
Golden Queen10

PEPPER.

Sow in hotbed as early as April, and transplant to rich, warm, mellow soil, as soon as the weather has become warm and settled, setting them about 2 feet apart in drills 3 feet apart. One oz. to 1,500 plants.

	Oz.	4 Oz.
Long Hungarian (Yellow or Banana)40	1.50
Mammoth Golden Queen35	1.00
One of the largest of the sweet, yellow peppers; resembles Ruby King in size, form and mild flavor; green in color, fruit pendent, 3 lobed, 4 inches high by 3½ diameter, turning yellow at maturity.		
Ruby Giant, and Chinese Giant35	1.00
Largest of all. Red.		
Sweet Mountain25	.90
Large; square shaped and mild.		
Ruby King25	.90
Fruit very large; bright red color. Very mild.		
Cayenne25	.90
Fruit long, hot and pungent.		
Red Chili25	.90
Small and prolific. Used for pepper sauce.		
Pimento30	1.00
California Wonder35	1.25
Resembles Chinese Giant in the large size and “blocky” form of its fruit, but having an extremely thick flesh not possessed by that variety; crimson fruit. Measures 4½ in. in length by 4 in. in diameter, mild and sweet; mid-season.		
Worldbeater35	1.25
One of the very best of the large peppers, being a cross between Chinese Giant and Ruby King, having the longer form and earliness of the latter with the size of the former. Fruits 4 lobed, 5 in. long by 3½ in. in diameter; flesh very thick and mild; exceedingly productive and a good shipper.		
Sunnybrook35	1.00
A tomato-shaped sweet, red pepper of much merit. Fruit smooth, upright, 3 in. in diameter by 2½ in. in depth with thick flesh; moderately early.		
Sweet Golden Dawn35	1.00
An early, sweet, mild, yellow variety, smaller than Golden Queen; fruit blocky in form like Bull Nose; 4 lobed, pendent, 3½ inches in height by 2½ inches in diameter; color light green, turning yellow at maturity.		
Large Bell or Bull Nose35	1.00
The oldest standard type and widely known of the Bell group. A reliable sort for the home and market garden.		
PLANT—20 inches tall, erect, very prolific.		
FRUIT—3½ inches long and 3 inches in diameter, squarish in shape; flesh, thick mild, ribs pungent; color, deep green, becoming scarlet upon maturity.		

PARSNIP.

Sow the seed in drills 15 inches apart as early as possible in spring, and thin the plants until they are 5 or 6 inches apart in the rows. The roots are much improved by frost; to be dug up as required. On the approach of cold weather, cover them heavily with manure or litter. Deep, rich, heavy soil is best suited to the culture of Parsnips, and the roots will be smooth and large if no fresh manure is used, as this tends to make them coarse-grained and misshapen. One-half oz. to 50 feet of drill; 3 pounds to the acre.

	Oz.	¼ lb.	Lb.
Large Hollow Crown Sugar10	.25	.75

PEANUT.

Make rows two or more feet apart, and drop seed eight inches apart. Matures very early, and may be planted after oats in July.

	Lb.
Virginia25

RADISH.

Sow in sheltered spot, the earth being deeply dug, highly fertilized, and raked free from clods and stones. Radishes grown on poor, thin soil cannot be made good; they will be misshapen and tough. To be good they must be grown quickly. Radishes can be forced by covering with a window or a sash. One oz. to 100 feet of drill; 10 to 15 pounds per acre.

	Oz.	¼ lb.	Lb.
Icicle10	.25	.50
Long, smooth, white forcing radish.			
Scarlet Globe10	.25	.50
Fine for forcing and open ground; very early.			
Crimson Giant10	.25	.50
Extremely large but never pithy; suitable for forcing or open cultivation; tender and crisp.			
Cincinnati Market10	.25	.50
Early Long Scarlet Short Top10	.25	.50
Early Scarlet Turnip Forcing White Tip.....	.10	.25	.50
French Breakfast10	.25	.50
White Strasburg10	.25	.50
White Lady Finger, or Long White Vienna10	.25	.50
Celestial, or White Chinese10	.30	.50
Best for fall; very large white radish.			
China Rose Winter10	.30	.50
Long Black Spanish Winter10	.30	.50
Round Black Spanish Winter10	.30	.50
Sparkler, Round White Tip10	.30	.50

RHUBARB.

Sow the seed early, and when the plants are large enough thin them to 4 or 5 inches apart. The next spring or fall transplant them 3 feet apart each way in deep, rich soil. For forcing, take up some large roots and place them in a dark corner of the cellar or greenhouse. Two oz. to 100 feet of drill.

	Oz.	¼ lb.
Victoria10	.30

SALSIFY, OR OYSTER PLANT.

When cooked, the roots have something of the flavor and odor of oysters. They may be boiled, used in soups, or grated and fried as friters. Culture the same as for parsnips and carrots. Roots are perfectly hardy, and may be left in the ground all winter. A quantity of roots for winter use may be stored in a pit or in sand or damp earth in a cellar. One oz. to 100 feet of drill.

	Oz.	¼ lb.
Mammoth Sandwich Island20	.75

SPINACH.

One of the most important crops grown for greens, and may be had in good condition from very early in the spring until cold weather. For early use sow very early in spring, and for succession at intervals. The main crop for spring and winter use should be sown in September and the plants covered for winter.

One-half oz. to 100 feet of drill; 6 to 8 pounds to the acre.

	Oz.	¼ lb.	Lb.
Long Standing05	.15	.35
New Zealand10	.25	.75
Bloomsdale Savoy05	.15	.35

SQUASH.

Seed should not be planted in spring until all danger of frost is past. Plant in hills 5 feet apart for bush varieties and 6 to 8 feet apart for running sorts, putting 6 to 8 seeds to the hill, finally leaving but 3 plants.

One-half pound to 200 or 300 hills; 2 to 3 pounds per acre.

	Oz.	¼ lb.
Early White Bush10	.25
Early; flat scallop shape.		
Summer Crook-Neck10	.25
Fruit about one foot long with crooked neck.		
Warty Hubbard15	.25
A Hubbard squash completely covered with warts.		
Delicious15	.25
A fall and winter variety.		
Golden Hubbard15	.25
Boston Marrow, similar to Hubbard15	.25
Banana Squash15	.25

TURNIP.

For early, sow as soon as the ground can be prepared, in drills 15 inches apart, and thin the plants to stand 8 inches apart. Sow for succession at intervals of two weeks until the last week in July, and from that time onward until the last of August sow for main crop. The sowings should always be made just before a rain, if possible, as the success of the crop depends, in a great measure, upon quick germination and rapid growth of the young plants. One oz. to 300 feet of drill; 1 pound to the acre.

	Oz.	¼ lb.	Lb.
Extra Early White Milan10	.25	.75
Early Purple Top Milan10	.25	.75
Red, or Purple Top Strap Leaf10	.20	.50

Seven Top10	.20	.50
American Purple Top Ruta Baga10	.20	.50

TOMATO.

As the plants advance in growth support them by brushwood. To have the Tomato very early it is necessary to start the plants in a hotbed, or they may be reared in a flower pot in a window and subsequently transplanted. Plants for an early crop should be raised under glass. For intermediate crop they may be raised on outside beds. For late crops the seed may be planted in permanent position.

One oz. to 2,500 plants; 2 oz. to the acre.

	Oz.	¼ lb.
Ponderosa40	1.50
The largest tomato grown; rich crimson; solid flesh.		
June Pink25	.90
Spark's Earliana25	.85
Very early; bright red, smooth and of good size and excellent flavor.		
Break O'Day35	1.25
Dwarf Champion25	.85
Very early; dark purplish red.		

TOMATO—Continued.

	Oz.	¼ lb.
John Baer A very early, large red variety of fine quality.	.25	.85
Wayahead A very early, smooth, solid, red variety with potato-leaved foliage; fruit about the size of Earliana and will ripen with it if not a few days earlier.	.35	1.25
Prolific Early red variety of fine quality.	.75	2.50
Asgrow Scarlet Dawn. A new very early variety.....	.50	1.50
Golden Ponderosa Largest of the yellow tomatoes and similar to Ponderosa except in color of fruit.	.40	
Early Detroit Very early; vigorous and productive; color scarlet.	.25	.90
Bonny Best, A good forcing variety Very early; vigorous and productive; color scarlet.	.25	.90
Crimson Cushion (Beefsteak or Enormous) The largest of the bright red tomatoes; really a Red Ponderosa.	.40	
The Stone Very large and smooth; ripens evenly bright scarlet.	.25	.75
Pritchard or Red Topper Very early; smooth, round and of superior quality.	.35	
Chalk's Early Jewel Very early; smooth, round and of superior quality.	.25	.85
Greater Baltimore, Indiana Strain Large as Stone; deep red, very solid and productive.	.25	.85
Golden Queen Yellow; ripens early; its large size, smooth and solid.	.30	
Yellow Pear Used for Preserves.	.30	
Red Pear Used for Preserves.	.30	
Marglobe Certified35	

TOBACCO.

Sow the seed in plant bed in March. Transplant when five or six leaves appear. Set in rows 3½ feet apart, 18 to 30 inches apart in the row, according to variety. When the bud appears, break off the top, leaving 16 leaves to mature. Keep off all suckers growing from the stem. When the leaves have become waxy and brittle it is ripe. Cut and hang the stock in a shed to dry.
